

Project Name - Comparison of Region Based on Sales

Analysis Made:

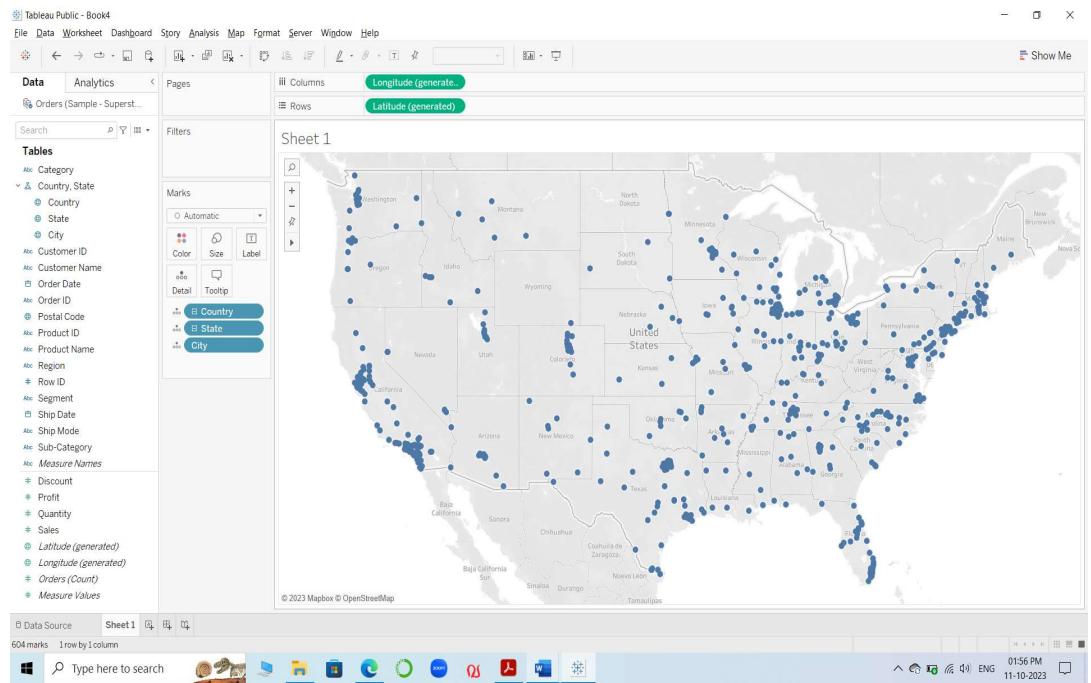

1. Dataset used – Sample Superstore

The screenshot shows the Tableau Public interface with the title "Orders (Sample - Superstore (1))". The left sidebar displays connections to "Sample - Superstore (1)" and sheets like "Orders", "People", and "Returns". The main area shows a preview of the "Orders" sheet with 24 fields and 9994 rows. A small preview grid is shown above the table, and a message at the bottom says "Need more data? Drag tables here to relate them. Learn more". The bottom status bar shows the date and time as 01:26 PM 11-10-2023.

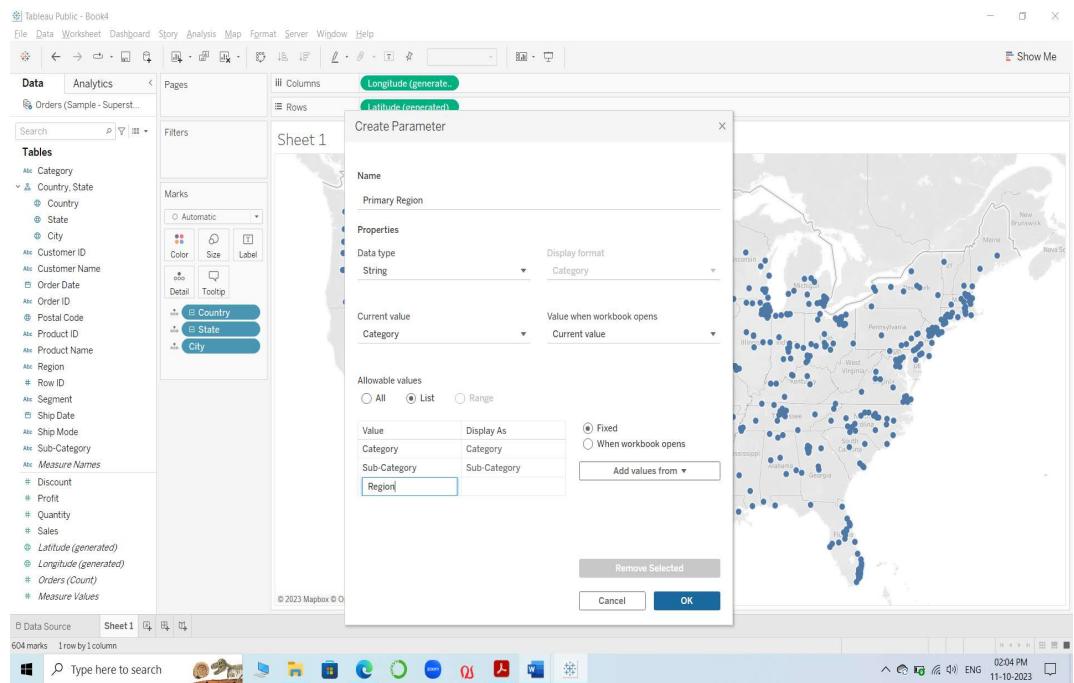

2. Sheet – 1 (First Order Date)

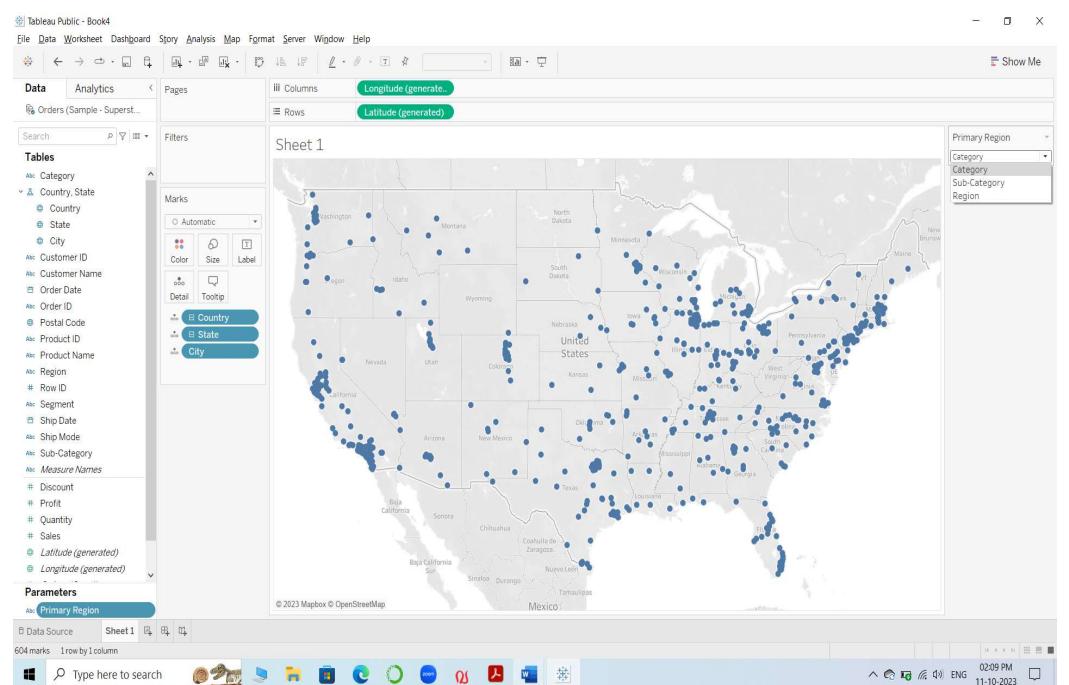

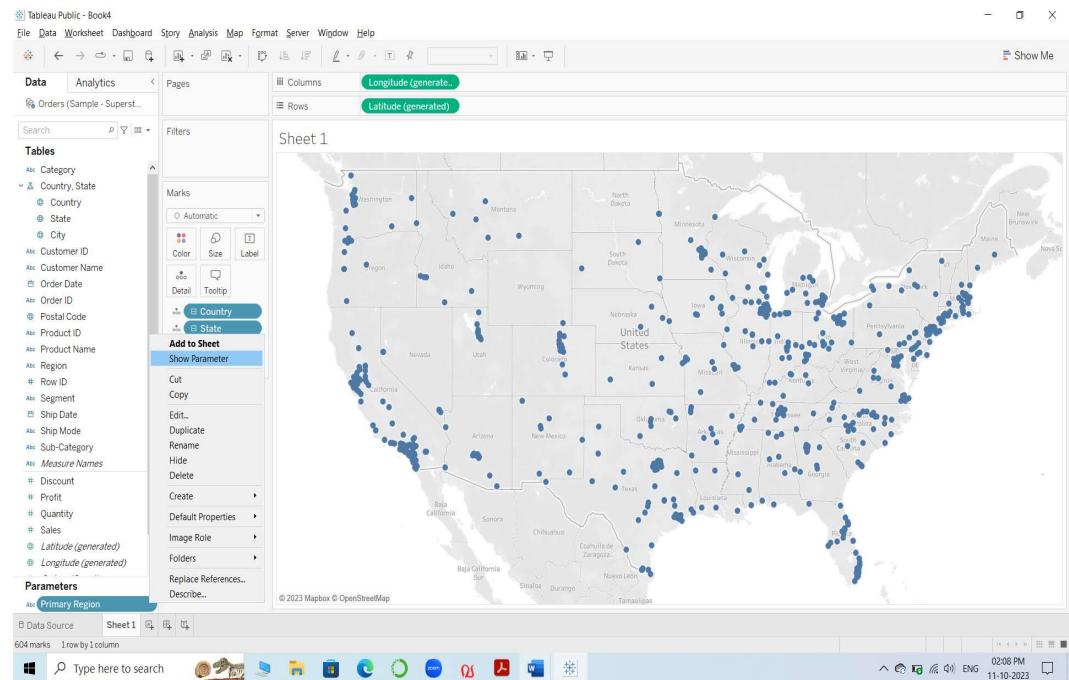

I. Create a hierarchy

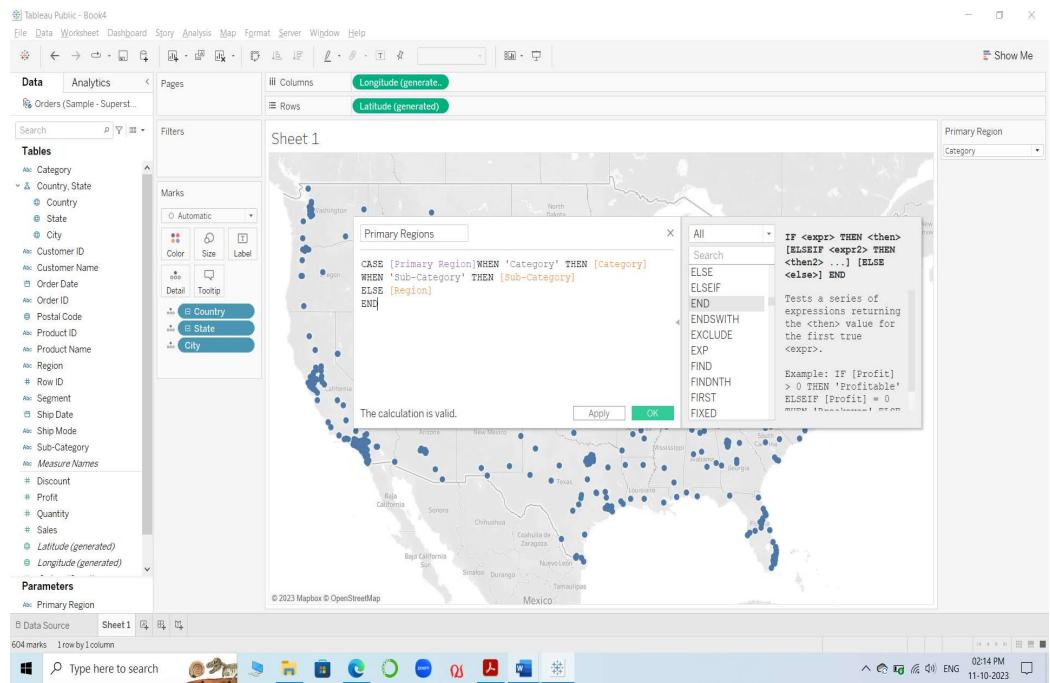

The screenshot shows the Tableau Data Editor with the title "Sheet 1". The left sidebar lists various dimensions and measures. A dialog box titled "Create Hierarchy" is open, showing a field named "Country_Region". The bottom status bar shows the date and time as 01:54 PM 11-10-2023.

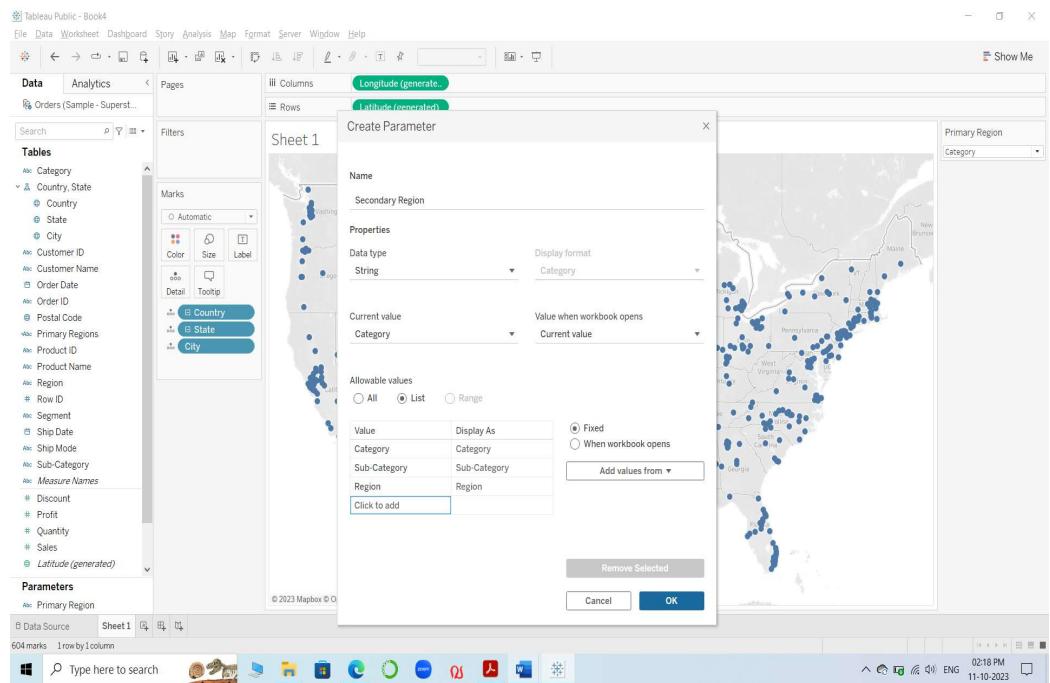

II. Primary Region

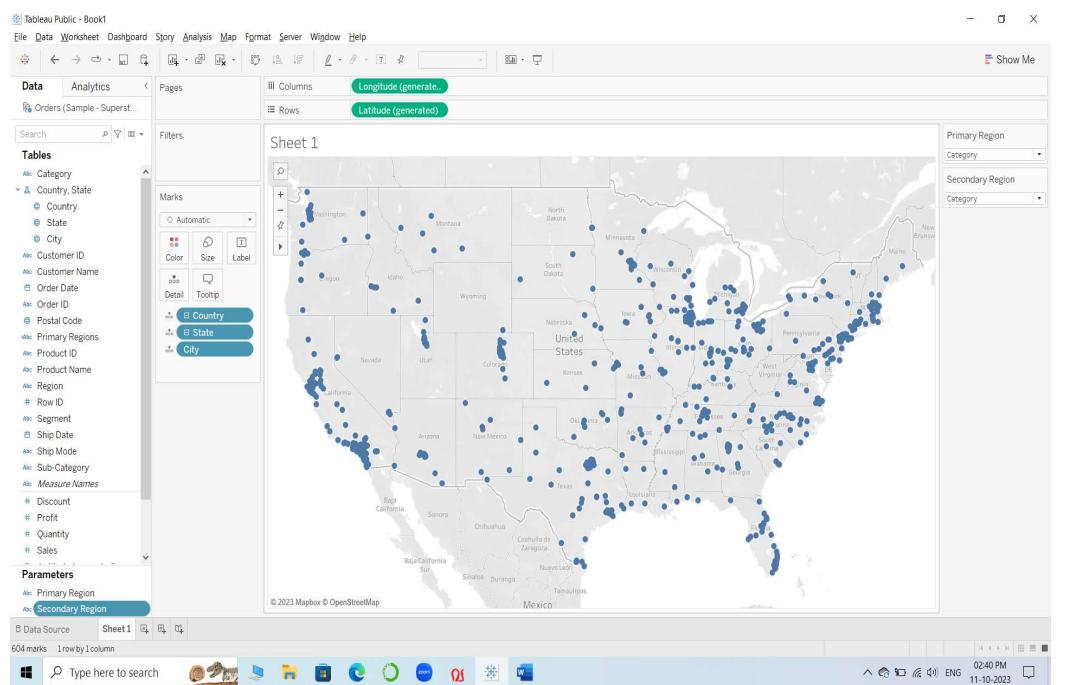

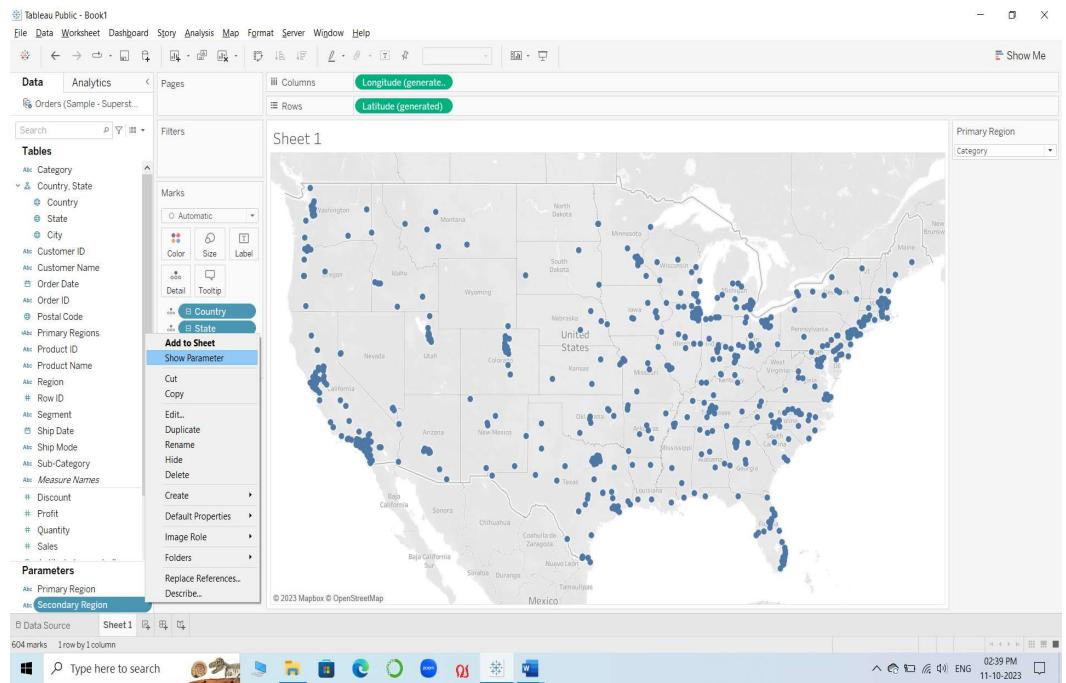

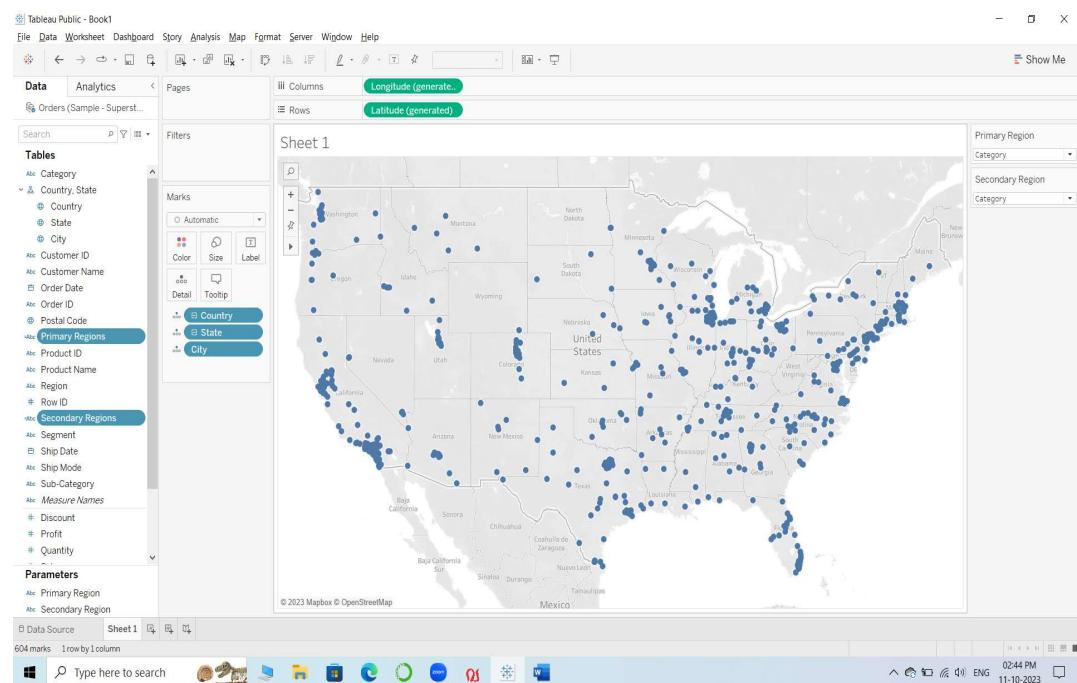

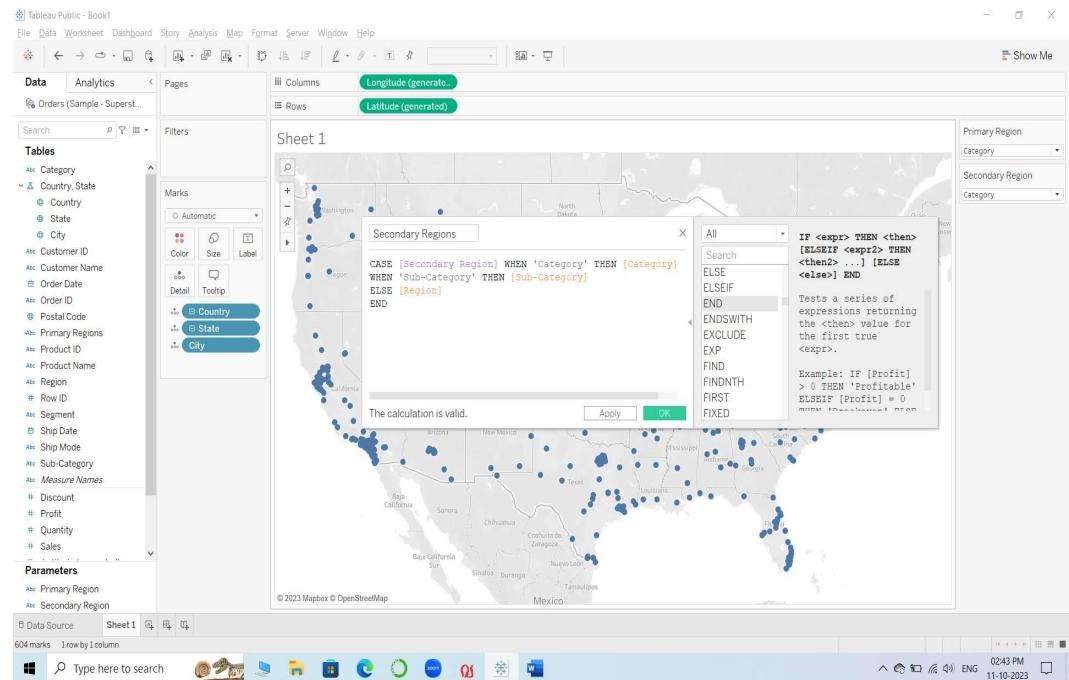

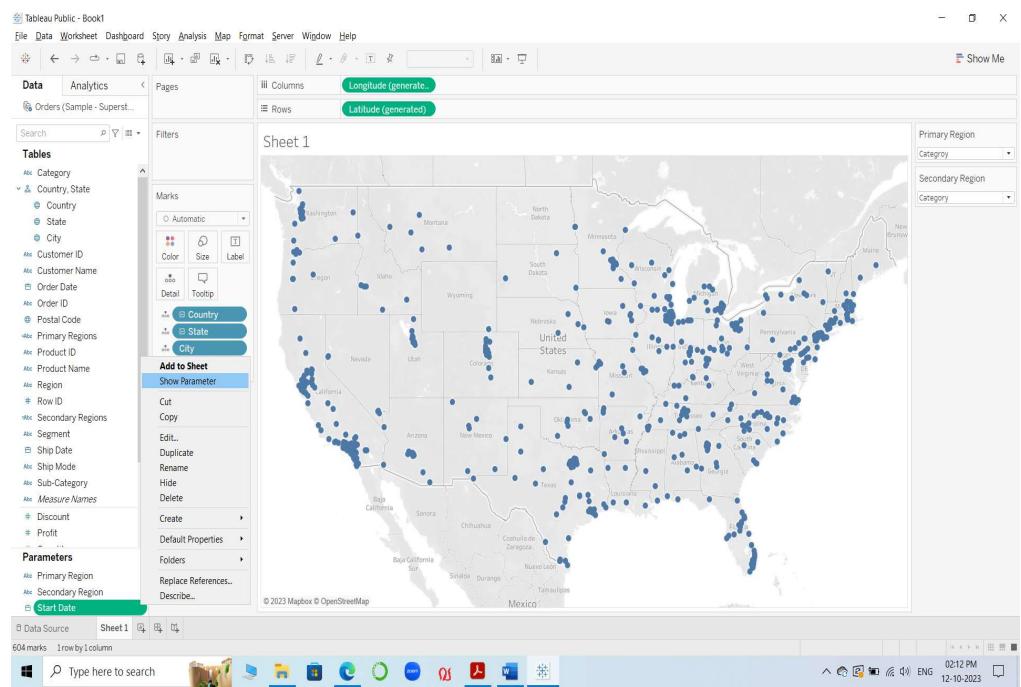

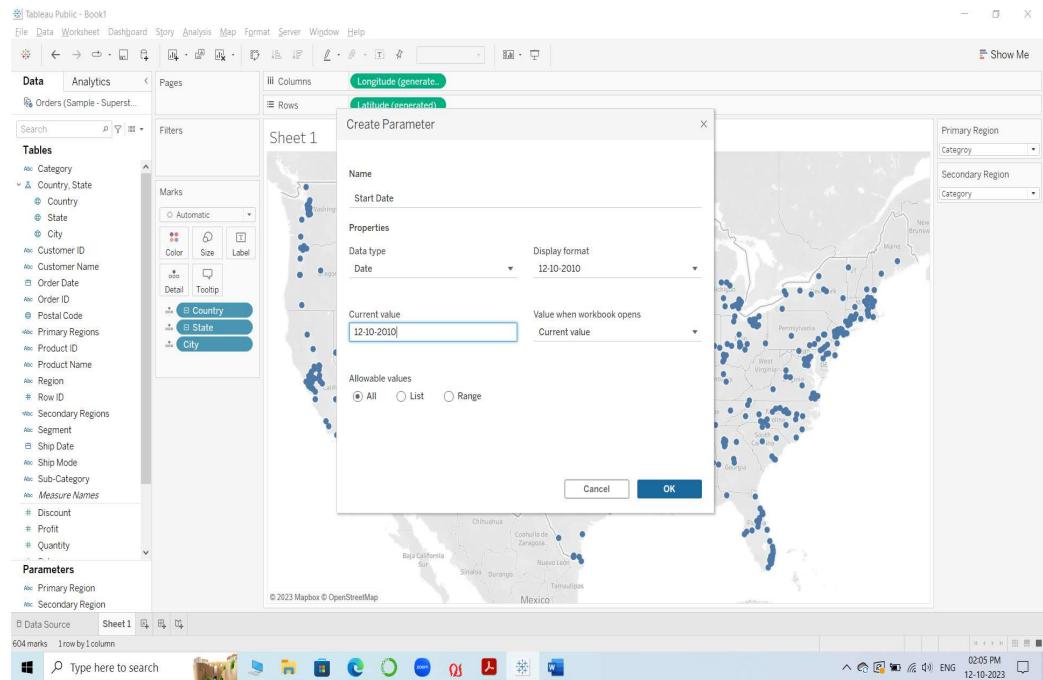

III. Secondary Region

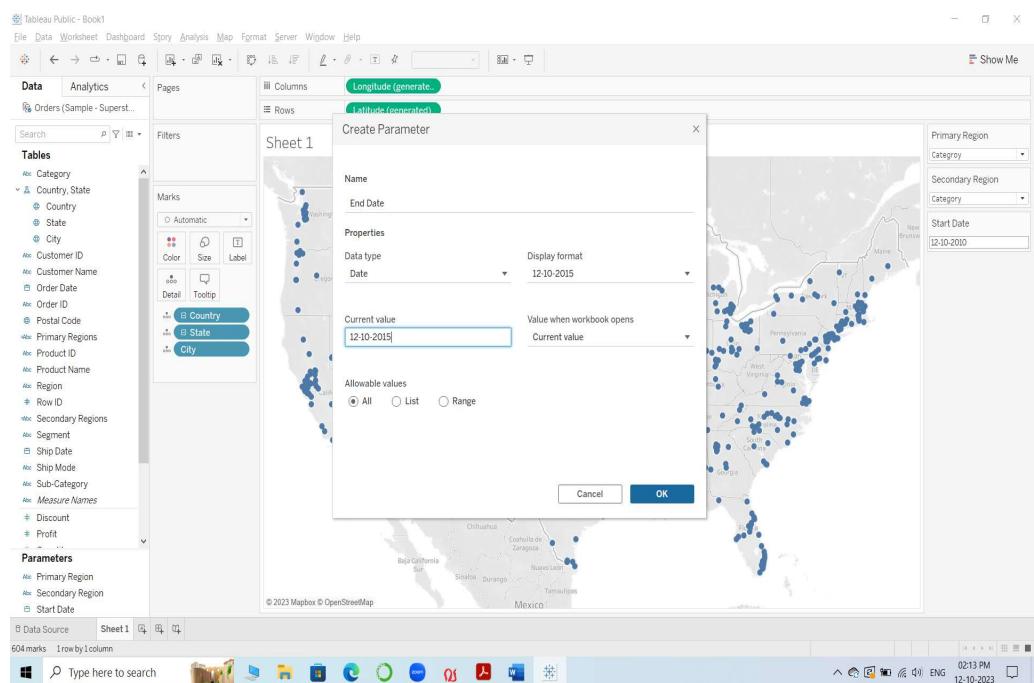

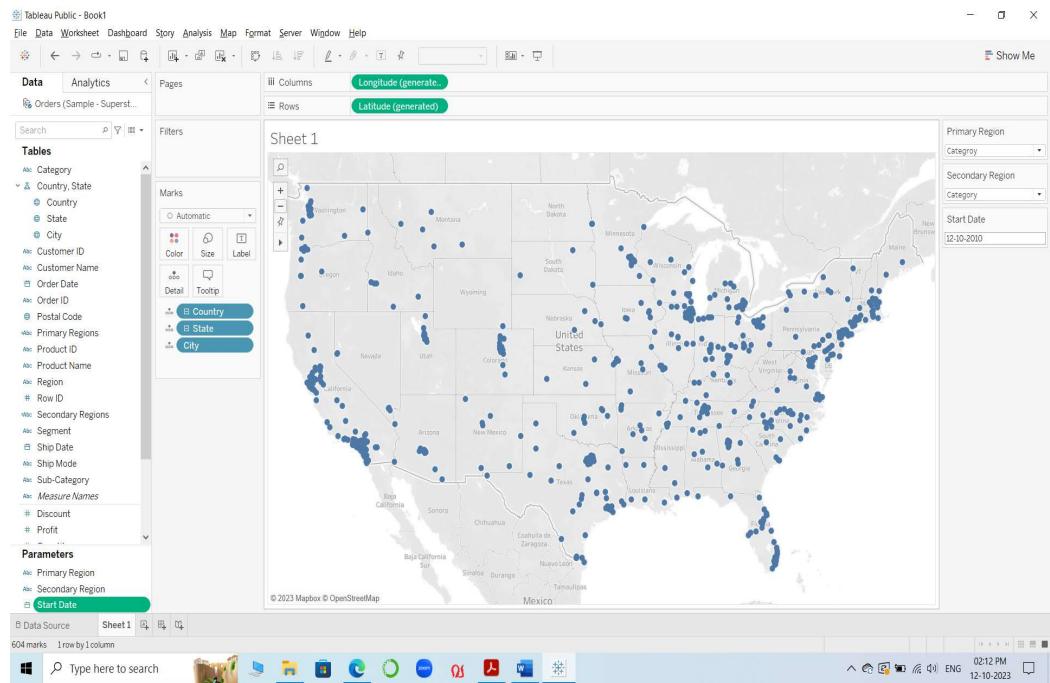

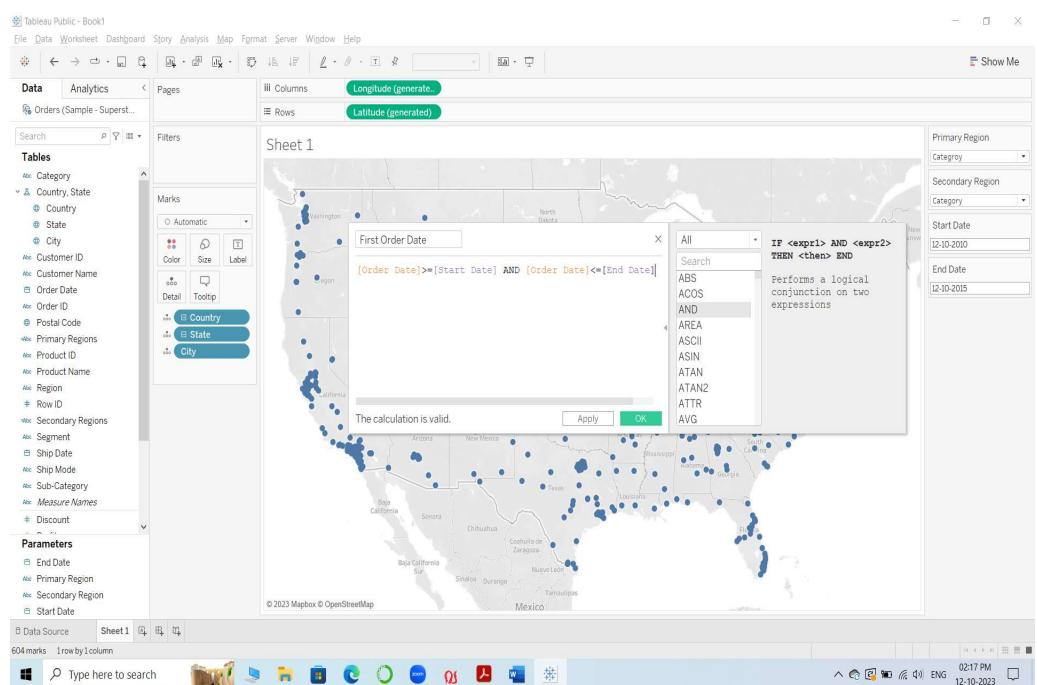

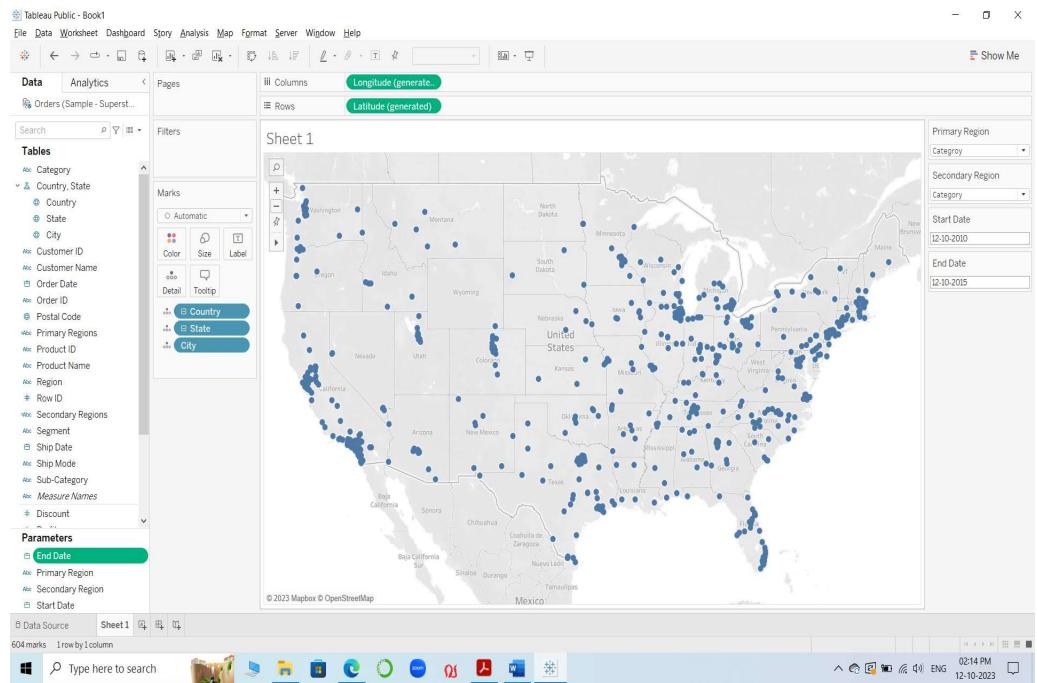

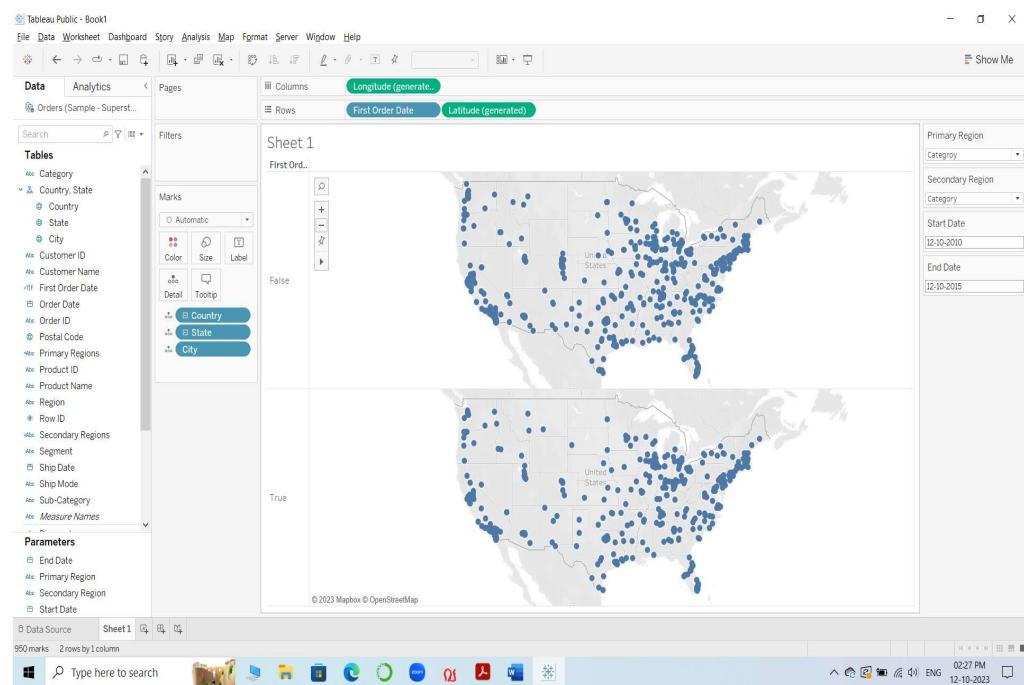

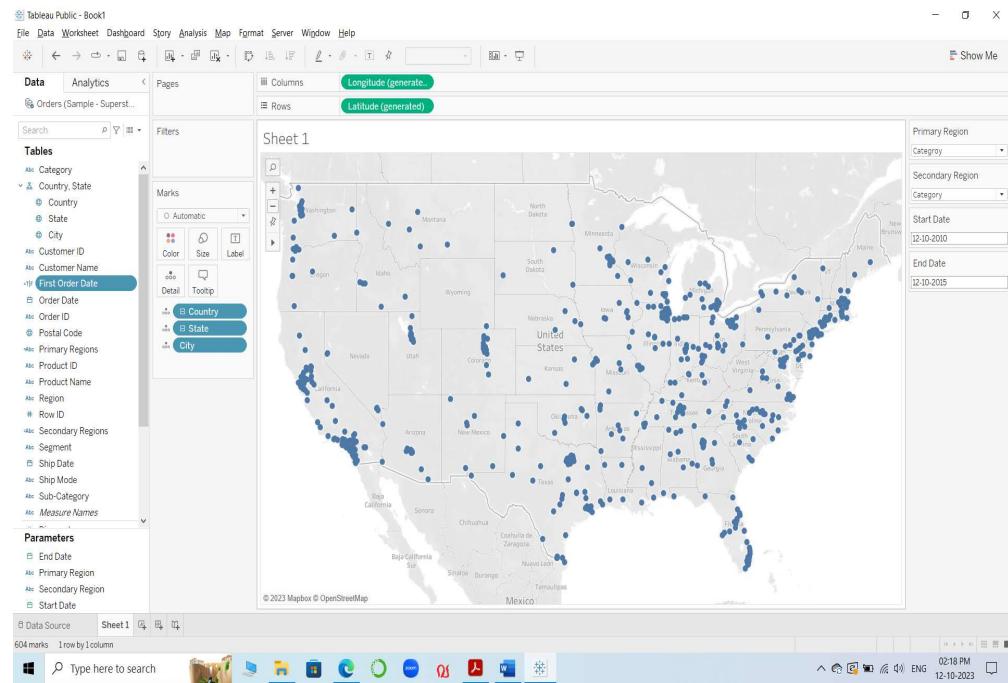

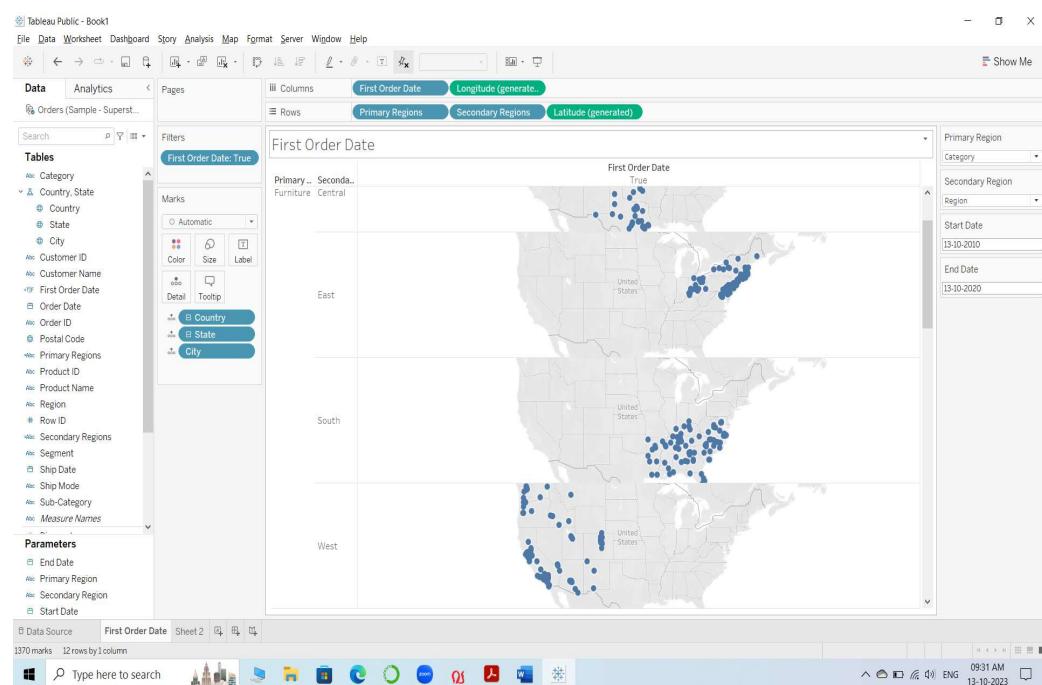

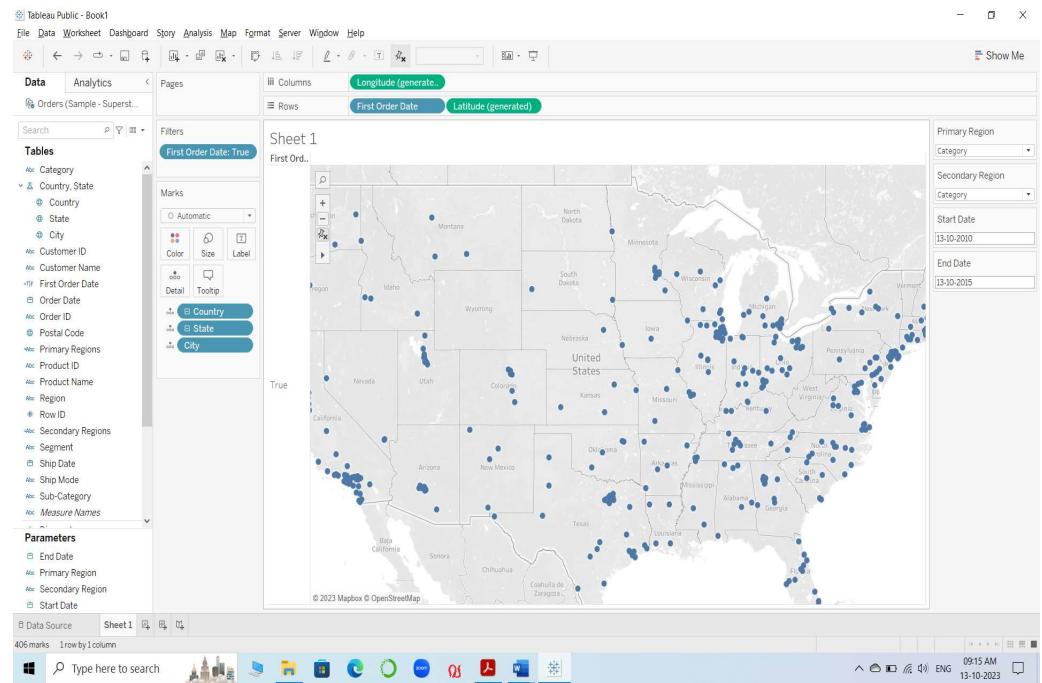

IV. First Order Date

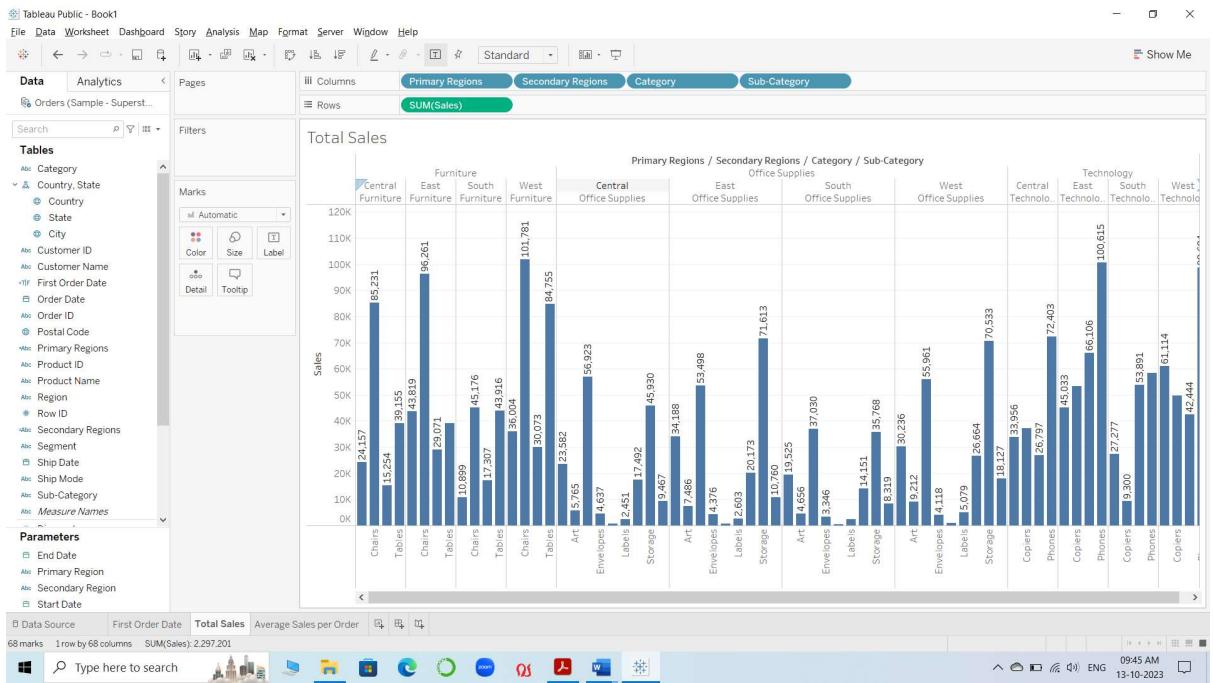

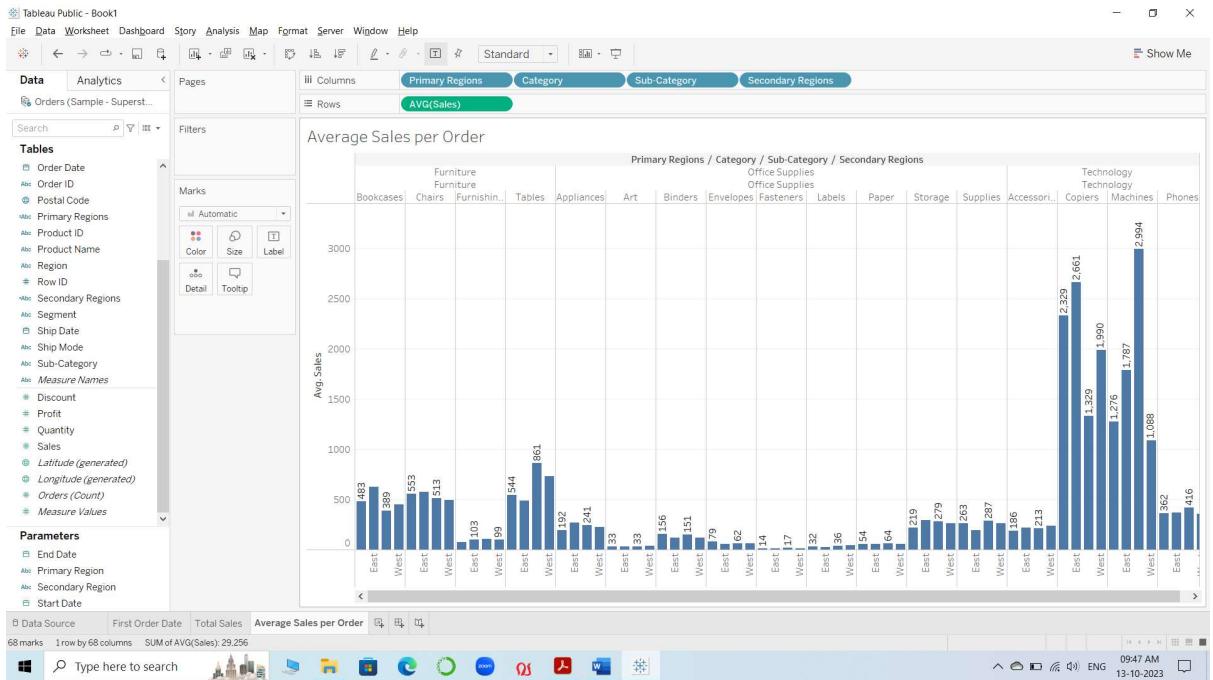

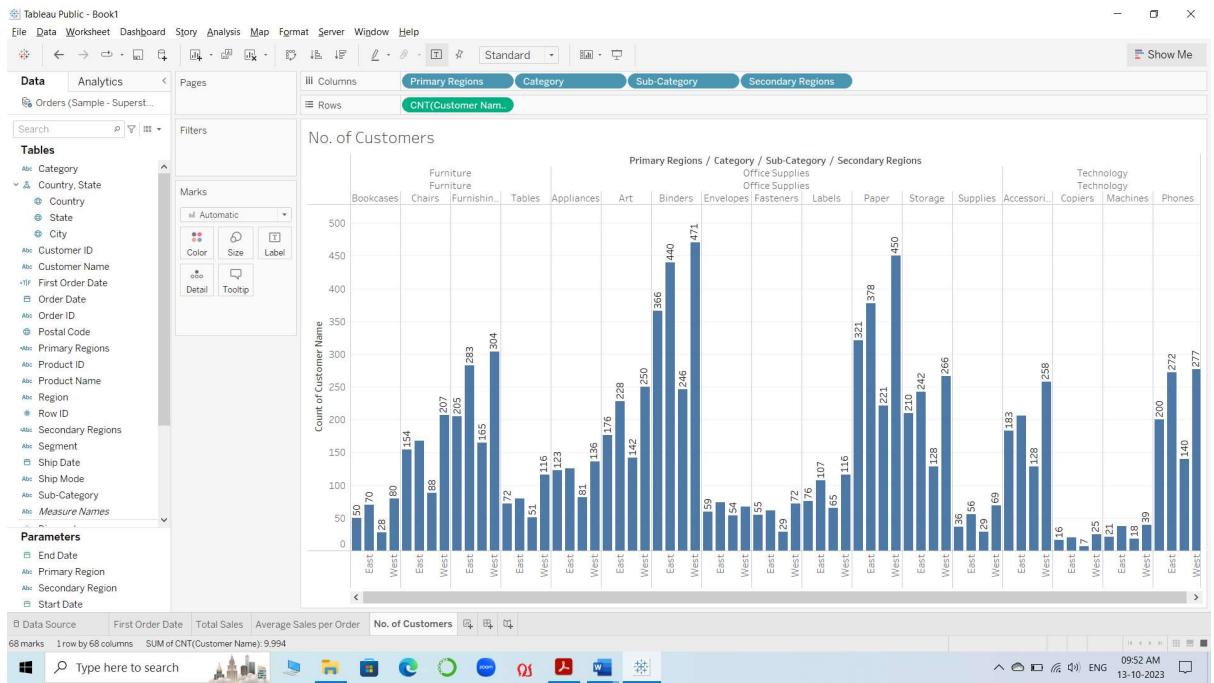

3. Sheet – 2 (Total Sales)

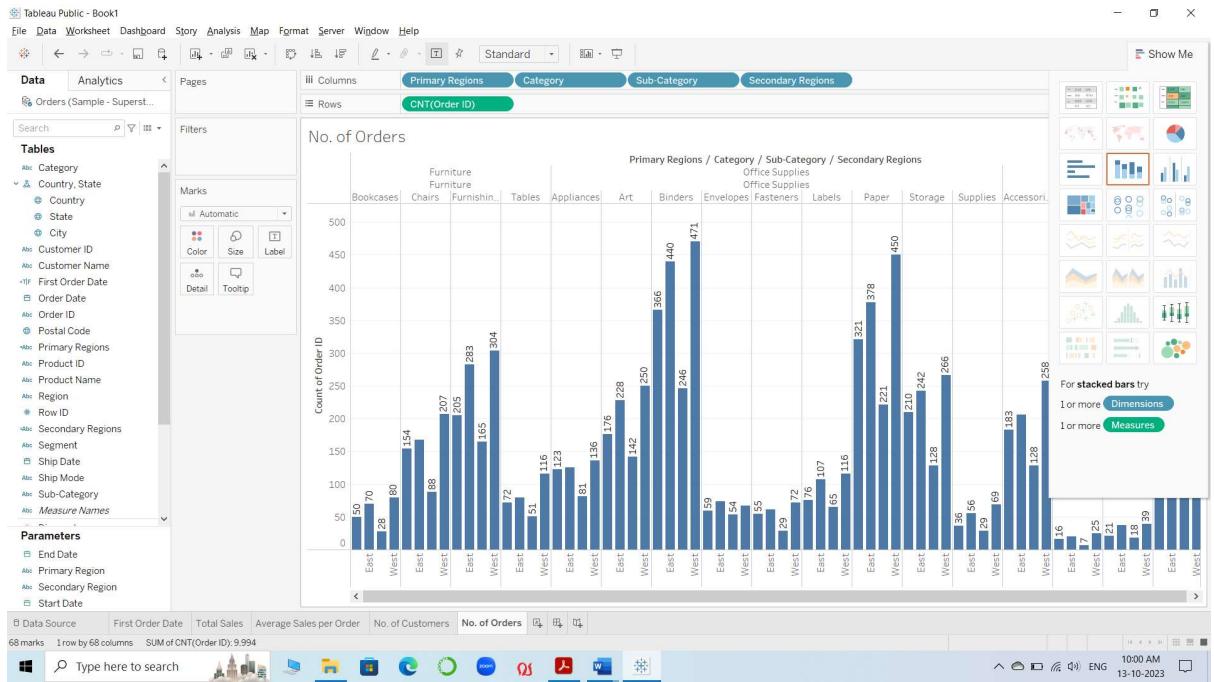

4. Sheet – 3 (Average Sales per Order)

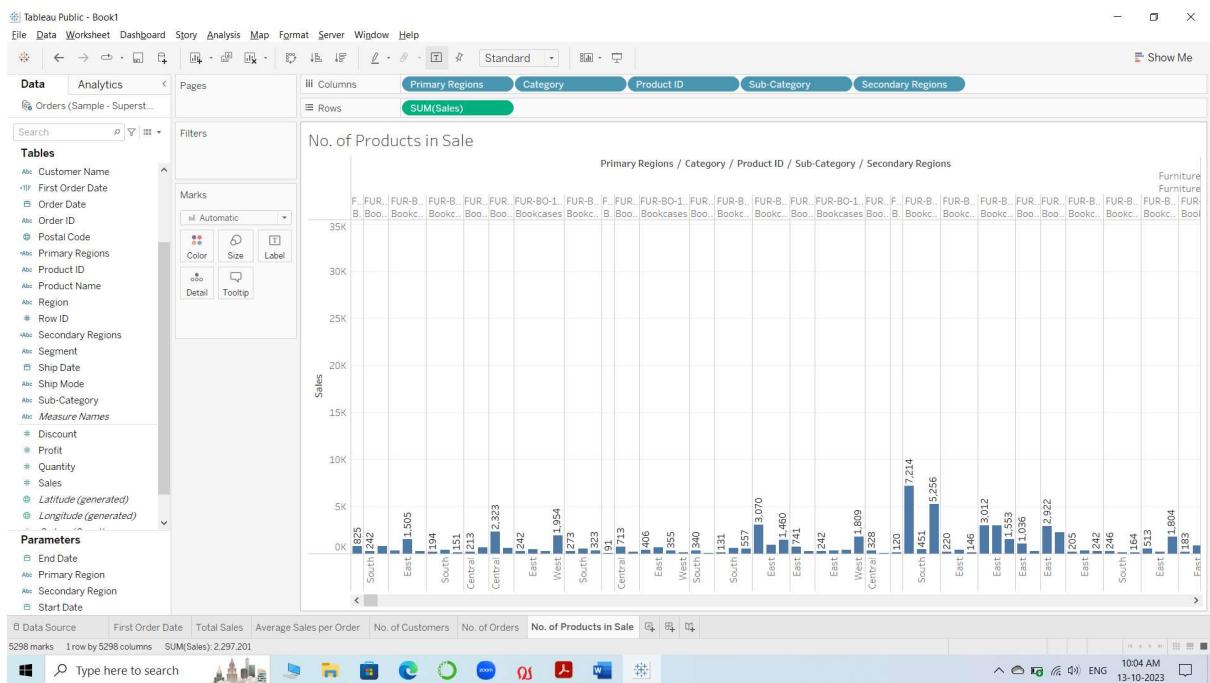

5. Sheet – 4 (No. of Customers)

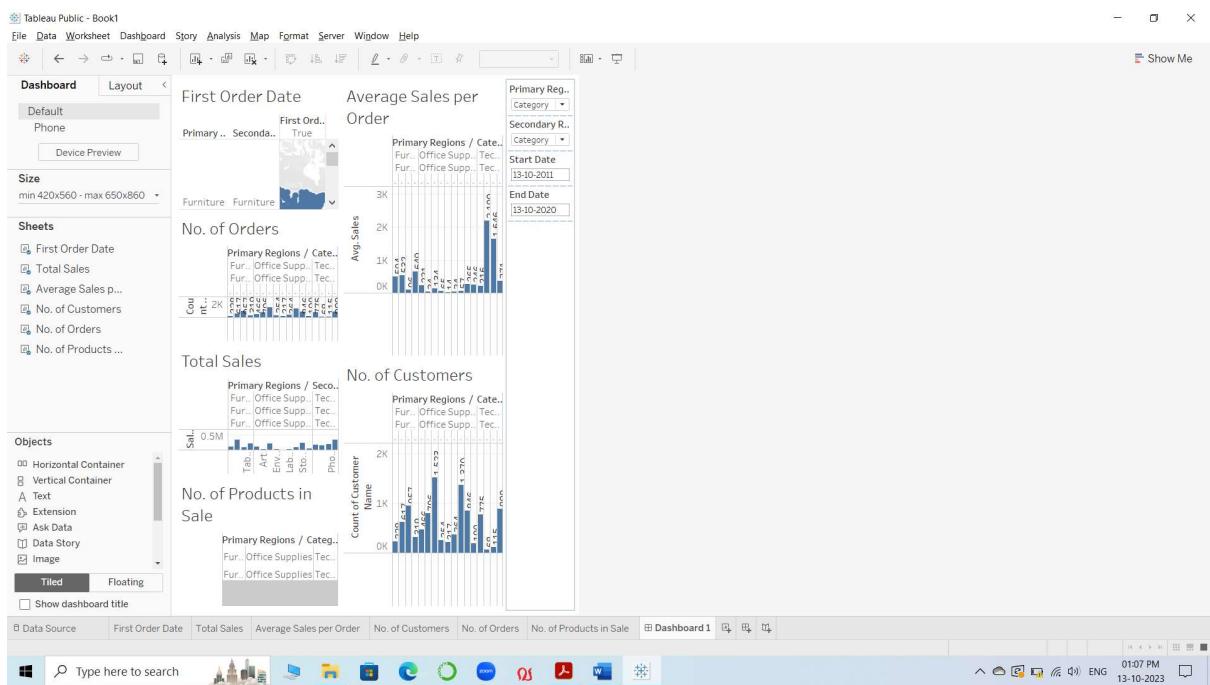

6. Sheet – 5 (No. of Orders)

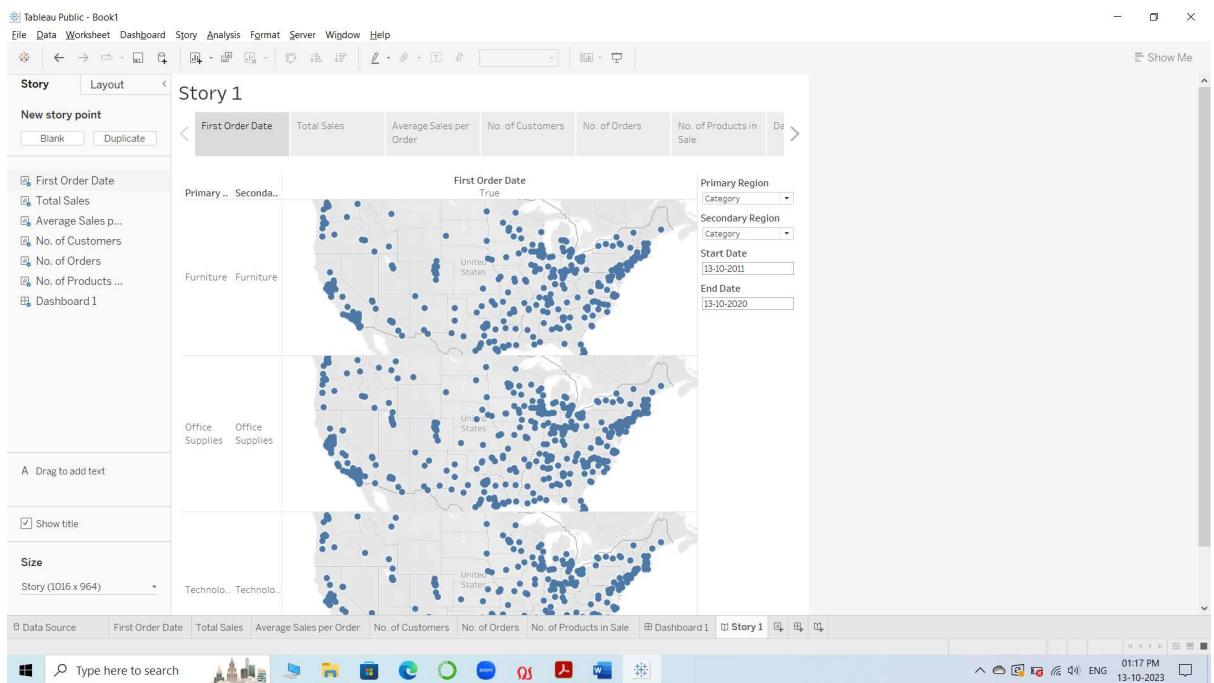

7. Sheet – 6 (No. of Products in Sale)
